

CPR COURSE

A heartfelt subsidy

Letter from Vernon Kang

*Chief Executive Officer
Singapore Heart Foundation*

WE REFER to "A CPR course subsidy?" (Sept 23). The Singapore Heart Foundation training programme, which offers certification for both cardiopulmonary resuscitation (CPR) and the use of an automated external defibrillator (AED), remains the

most affordable in Singapore. The subsidised course fee that SHF offers includes the CPR 3A (Anyone, Anytime, Anywhere) Kit, which alone costs \$60.

The CPR 3A Kit is a unique learning tool that enables participants to refresh their CPR skills as often as they wish to help instil confidence and enable them to perform quality CPR. Being a portable kit, it also has a multiplier effect of getting

more people trained in CPR. This is the only such kit available in Singapore and is unique to SHF.

The SHF has decided to extend the introductory course fee of \$100 (excluding GST) to the end of the year. We hope that this will encourage more people as well as corporations and community organisations to come on board this certification programme to help save more lives.
